## Company profile

### Illinois Toolworks Inc. (NYSE: ITW)

**ITW is a Fortune 200 global multi-industrial manufacturing leader.** The company's seven industry-leading segments leverage the unique ITW Business Model to drive solid growth in markets where highly innovative, customer-focused solutions are required.

**ITW's products and solutions are at work all over the world,** in deep-sea oil rigs, aerospace technology, the spaces in which we live and work, the construction of those spaces, the cars we drive, and the mobile devices we rely on.

**ITW is committed to operational excellence** and systematic new product development that helps our customers create the products and services that make their operations run smoothly.

### ITW Construction Products Offsite

ITW Construction Products Offsite is part of the Illinois Toolworks family, an international corporation with over **100 years in the building and manufacturing industry.**

We are a **trusted partner to leading offsite component manufacturers,** allowing our customers to design, manufacture and sell the highest quality roof, floor and wall components.

Our collaborative and problem-solving approach ensures we remain a leader in technology, research

and development – providing innovative solutions, support and superior service with market leading brands: **Cullen, Gang-Nail, Paslode** and **Toolmatic.**

### TOOLMATIC®

Our German engineered innovative Toolmatic range of tools brings major benefits in reliability, durability, high speed and long service intervals. **Toolmatic tools are designed specifically for automation with only one air feed and one power line to attach.** This simplifies attachment and eliminates the mess of wires required for modified hand tools. Toolmatic automated fastenings allows us to create a solution geared to the precise requirements of each production line, from a wide range of optional features and fastener systems. This maximises productivity, whilst eliminating the cost of unnecessary features.

**Internationally renowned and highly regarded, Paslode has been at the heart of the revolution of hammer-free fixing and nailing for 80 years.**

By combining the specialist capabilities of our Paslode range with our unique Toolmatic solution for automated fastening we are able to offer a wide range of pneumatic tools and fasteners. Our German engineered Paslode range meets the needs of the timber frame, modular, volumetric, roof truss and engineered floor manufacturer.

TRUSSED RAFTER ASSOCIATION

# Overview

## Overview

ITW Construction Products is internationally renowned as an **innovator and leader in the manufacturing of automated fastening solutions for timber frame construction.**

We offer a wide range of pneumatic tools and toolmatic solutions for fasteners, that meet the needs of the timber frame, roof truss and engineered floor manufacturer.

## Benefits of using Toolmatic solution

Toolmatic brings major benefits in **reliability, durability, high speed and long service intervals.** These tools are reliable due to the high precision hand built assembly in Germany. We provide onsite Toolmatic training and offer spare parts specific to each tool.

We work continually to advance our German engineered Toolmatic range with current market requirements. Designed for offsite customers with influence from leading manufacturers coupled with ITW's knowledge and flexible solutions, **we have the tools to meet the needs of timber frame manufactures.**

## Benefits of using Paslode Pneumatic Nailing

For all your timber construction needs. Paslode is internationally renowned. Over many years the Paslode brand has built an enviable reputation for delivering best-in-class nailing systems, revolutionising construction methods and **maximizing product quality, reliability and offsite safety.**

## What makes us unique

Our products have made a name for themselves by holding positions in niche markets where ITW technology can address customers' unique needs like higher global standards for safety and energy efficiency as well as the growth of offsite construction projects.

**We are a fully integrated supply partner for all things related to the offsite and prefab industry in U.K, Ireland and Nordics.**

With an experienced technical team, premium fixings and our own metalwork brand, **we are the only company that can provide a holistic service for all your truss, panel, joist and metalwork needs.**

## Service offer

With dedicated professional service centres in the UK and Europe we're able to offer local supply that's backed by international support.

# About Toolmatic

A high degree of prefabrication is playing an increasingly important role in construction nowadays.

**Toolmatic is the brand for the production of high-quality large-scale timber construction.** State-of-the-art systems, these devices are used in automated processes where panel materials are fastened with fixings or stud framing – should be fastened with a market leading Paslode range of fixings/ studframing. **The possibility of combining different Toolmatic components with our Paslode range means that optimal, customer-specific solutions can be offered.**

## How Toolmatic solutions add value

### Simplification

Toolmatic tools are designed specifically for **automation simplifying attachment** and eliminating mess of wires needed for modified hand tools.

### Precision

Toolmatic automated tools help deliver a perfectly balanced solution geared to the precise requirements of each production line activity **ensuring consistent spacings, accuracy of position and depth of required fixing.**

### Minimizing Downtime

**All mechanical characteristic are designed to extend service intervals to minimise downtime and keep you running.**

### Quality

Toolmatic pistons are PTFE/copper alloy sealed requiring no lubrication and ensuring clean operation eliminating maintenance downtime, reducing wear and tear and avoiding damage. The tools re-cycle exhaust air to cool the bumper. **This enables quicker fastening rates.**

### Time saving

Toolmatic tools are "ready to mount" with appropriate fixing brackets. **No unnecessary time or cost is wasted.** We forge partnerships together with automated line manufacturers and timber framers.

### Health and Safety benefits

Since Toolmatics tools are designed for automation, there is minimal risk for injuries, resulting in an overall safer work environment. The tools work incredibly efficiently and **lower the noise level** significantly compared to manual production which is an added benefit in creating a healthier and safer work environment for employees.

# About Paslode

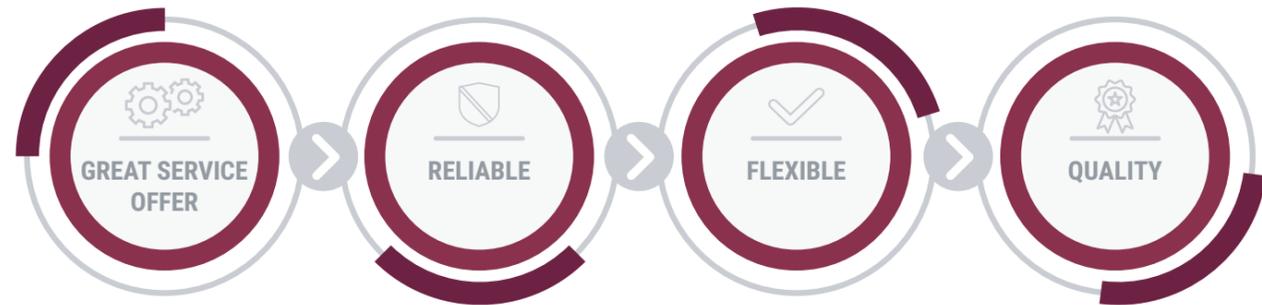

## About Paslode

Founded in 1935, Paslode has become the world's leading manufacturer of timber to timber fastening systems.

Over many years the Paslode brand has built an enviable reputation for delivering best-in-class nailing systems, revolutionising construction methods and reducing labour time whilst increasing product reliability.

With in-house European production plants, rigorous quality control measures and supply chain assurances, Paslode boasts a high-quality tool and consumable manufacturing, providing subsequent peace of mind for customers when using their products.

## Benefits

ITW always provides a high level of service.

## Service

### Experience

We remain a leader in technology, research and development, regularly collaborating along the value chain. **We are constantly working with construction experts to create future-proof and innovative compliant solutions that increases productivity and solves industry problem.**

With more than a 100 years of experience in manufacturing globally, our ITW staff are highly trained and experienced in providing high-quality service to customers.

### Service Team

We recognise that outstanding service is crucial in the construction industry and can assure a positive experience from a dedicated team of experts. With our service team, you are fully supported by our highly qualified technical teams. With decades of experience, our technical experts are ready to offer assistance in timber engineering related matters.

Our skilled professionals are not only experts within ITW, but they also play a **leading role in the industry's representative bodies across the globe.**

What makes us unique is that we have technical team members who are constantly involved in **finding and developing innovative solutions to future challenges** with these industry bodies. Assisting and driving the creations and updates for building legislation and standards.

# Toolmatic 0 Degree Plastic Collation Tools & Fixings

Plastic collation Toolmatics are the market leading tool option for automation.

### Benefits

| CT550  | CT850   | Applications            |
|--|---|-------------------------|
| Reliable, quick, larger coil capacity, no lubrication required | Pusher system technology  | Timber framed sheathing |
| Compact body, large air buffer for faster nailing              | Very quiet, holds board to frame for enhanced fixing to frame and air tightness (0.1mm) | Timber framed Cladding  |
|  |   | Plasterboard* CT-850    |

### Zero Degree Plastic Coil Nailer – IN Collation

| Description        | Nail Dia – mm | Nail Length – mm | Magazine Capacity | Degree | Nails per second | Air pressure (bar) | Tool Weight – Kg | Air Consumption |
|--------------------|---------------|------------------|-------------------|--------|------------------|--------------------|------------------|-----------------|
| CT-550 Coil Nailer | 2.5-2.9       | 50-65            | 1200              | 0      | 6                | 5 to 8             | 6.5              | 2.5             |
| CT-850 Coil Nailer | 2.5-2.9       | 50-65            | 1200              | 0      | 1                | 5 to 8             | 10               | 2.5             |

### Fixings – Plastic Coil Collation

| Code   | Dia – mm | Length – mm | Shank Type | Point   | Head Dia – mm | Finish | Service Class | Pallet Qty |
|--------|----------|-------------|------------|---------|---------------|--------|---------------|------------|
| 395456 | 2.9      | 50          | Smooth     | Diamond | 5.6           | EG 12  | 2             | 36         |

# Toolmatic Stapling & Staples

The Toolmatic stapler range is designed from smaller volume use with ease of loading to the higher volume where the advantage of large magazine capacities play a crucial role in minimized downtime.

These flexible tools operate through 360 degrees and can be used on bridges and on modern robotic arms.

S210

S220

S540

## Benefits

| S210   | S220                              | S540  |
|--|-----------------------------------|---|
| Simple and easy to load tool, robust and reliable                  | Compact tool, robust and reliable | High Speed fastening, robust and reliable                                 |
| Low profile and compact, large air buffer for high speed fastening | Can be used through 360 degrees   | Cassette magazines can be preloaded with fixings and swapped over quickly |
|  |                                   | Minimizing downtime   |
| Applications   |                                   |   |
| S210/220   | Breather membrane                 | House wrap  |
| S540   | Timber framed sheathing           | Timber framed cladding  |
